

InfoTronics Intelligent Terminal 850

An unparalleled low-cost and easy to use time recorder.

To meet the specific needs of small businesses, InfoTronics created the Intelligent Terminal 850. The I.T. 850 is a low cost, easy to install and easy to use time recorder for organizations that want to minimize their investment in a time and attendance system.

Designed with ease of use in mind, employees punch in and out simply using a PIN code or by passing a proximity card near the reader. Punches are stored in the I.T. 850 for retrieval by Attendance Enterprise, a time and attendance system by InfoTronics.

Out-of-the-box functionality

The numeric keypad of the I.T. 850 provides nine of the most common operations performed at the time recorder such as:

- Supervisor edits
- Review Hours
- Tip entry
- Department Transfers
- Review Schedule

No special configuration is required; the numeric function keys are preprogrammed and labeled at the factory. Three programmable function keys are also available to accommodate site-specific requirements.

The compact design of the I.T. 850 makes it easy to install almost anywhere. Its durable plastic case conforms to Americans with Disabilities Act requirements.

Up to three I.T. 850 time recorders can be connected to a single PC serial port. With the optional network interface, I.T. 850 time recorders can connect directly to an existing computer network.

Integration with Attendance Enterprise

The I.T. 850 is fully integrated with InfoTronics' Attendance Enterprise employee attendance software. The I.T. 850 collects the employees' time and attendance transactions which are automatically imported into Attendance Enterprise for payroll calculations and management reporting.

The I.T. 850 has factory programmed function keys that are labeled for easy use.

Intelligent Terminal 850

InfoTronics Intelligent Terminal 850

An unparalleled low-cost and easy to use time recorder.

Intelligent Terminal 850

The Intelligent Terminal 850 Technical Specifications

- Alpha Numeric Display: 40 character backlit LCD display. Two lines of 20 characters each for display of employee name, messages and schedules on demand. Time displayed in 12- or 24-hour format, with or without seconds.
- Keyboard: Nine dual-function, preprogrammed keys and three customized function keys. Standard functions are:
